Bug Reports

Cannot mark long task as completed

Labels

High +

Description

Steps :

1 - Navigate to https://todolist.james.am

2 - Add a new task with a very long text (large length)

3 - Try to mark the task as completed

Expected Result : The task should display the complete option (checkbox/button) regardless of its text length, and the user should be able to mark it as completed.

Actual Result : When the task text is too long, the complete option does not appear, and the user cannot mark the task as completed.
